Objective(100 words)	<ol style="list-style-type: none">1. Foster Creative Thinking by encouraging participants to think creatively and explore innovative solutions to complex problems.2. Understand Design Thinking Process by providing a comprehensive understanding of the design thinking process, including stages such as empathy, define, ideate, prototype, and test.3. Develop critical thinking and analytical skills to assess the feasibility and impact of proposed solutions.4. Cultivate an innovation mindset that embraces experimentation, risk-taking, and learning from failure.5. Teach basic project management skills to help participants plan, execute, and manage their design thinking projects effectively.		

Benefit in-terms of learning/skill/knowledge obtained

Participants developed the ability to think creatively and generate innovative ideas. They understood the key design thinking process, including stages such as empathy, define, ideate, prototype, and test. Participants improved in their problem-solving skills by learning to define problems clearly and explore multiple solutions. They acquired various ideation techniques to brainstorm and develop a wide range of ideas. Gained hands-on experience in creating quick prototypes to test and iterate on ideas. Participants developed critical thinking skills to evaluate the feasibility and impact of different solutions. Overall, participants in Innovation and Design Thinking Challenge gained a well-rounded set of skills and knowledge that prepare them to approach problems innovatively, collaborate effectively, and create impactful solutions.
