About the session / Event

The session started by welcoming our faculty members and the speaker.

The objective of the Program -

- To attain the knowledge on Patent ideation and its process.

The session began with an introduction session on 'what is a Patent' and the policy requirements. The discussion began on how to ideate and check whether there is already an existing product or a design. To identify the publication there is a need to check the website "WIPO patent Scope" through keywords and the relevance. Furthermore the discussion was done about the format for applying for the patent in terms of Title, Objective, Detailed description, Claims and Abstract. There was a hands on session in the computer lab for better and clear understanding.

Outcome of the session: It was an interactive session and faculty were able to connect to the requirements of the patent.
